SUBJECT INDEX

A

Absent pulmonary valve syndrome

Absent pulmonary valve syndrome: considerations of management, 159

Acetylcholine

Cellular electrophysiologic effects of digitalis on human atrial fibers, 223

Adrenergic effects

Alpha and beta adrenergic effects on human atrial specialized conducting fibers, 84

Age

Age and relationship between coronary artery disease and plasma lipids. Letter, 1233

American Heart Association

A.H.A. Report of Ad Hoc Committee on Cigarette Smoking and Cardiovascular Diseases, 406A

American Heart Association and community cardiovascular health: an ethical comment. Report of the Committee on Ethics of the A.H.A., 645A

Aneurysm

Dissecting aortic aneurysm associated with congenital bicuspid aortic valve, 1022

Angina

Nifedipine therapy for Prinzmetal's angina, 137

Physiologic improvement following coronary artery bypass surgery, 831

Rate-pressure product as an index of myocardial oxygen consumption during exercise in patients with angina pectoris, 549

Thallium-201 scintigraphy in unstable angina pectoris, 738

Angiography

Cardiac trauma from angiographic injections: a quantitative study, 91

Clinical, angiographic, and hemodynamic assessment of late results after Mustard operation, 1214

Combined double chambered right ventricle and discrete sub-aortic stenosis, 299

Comparison between apexcardiographic and internal indexes of left ventricular performance in patients with aortic incompetence, 692

Coronary bypass graft fate: angiographic grading of 1400 consecutive grafts early after operation and of 1132 after one year, 1070

Criss-cross heart with concordant atrioventriculo-arterial connections, 396

Diffuse coronary artery disease in diabetic patients: fact or fiction, 133

Improved efficiency of treadmill exercise testing using a multiple lead ECG system and basic hemodynamic exercise response, 71

Multiple dipole electrocardiography: a comparison of electrically and angiographically determined left ventricular masses, 1129

Prediction of late survival in patients with mitral valve disease from clinical, hemodynamic, and quantitative angiographic variables, 341

Prediction of multivessel disease after inferior myocardial infarction, 1085

Relationships among ventricular arrhythmias, coronary artery disease, angiographic and electrocardiographic indicators of myocardial fibrosis, 725

Reliability and practicality of single crystal echocardiography in the evaluation of single ventricle: angiographic and pathological correlates, 269

Right ventricular ejection fraction in patients with acute anterior and inferior myocardial infarction assessed by radionuclide angiography, 1078

Role of the exercise test in the evaluation of patients for ischemic heart disease, 64

Spontaneous near closure of coronary artery fistula, 197

Two-dimensional echocardiographic recognition of ruptured chordae tendineae, 244

Animal studies

Alteration of the left ventricular diastolic pressure-segment length relation produced by the pericardium: effects of cardiac distension and afterload reduction in conscious dogs, 1191

Antiarrhythmic effects of aspirin during nonthrombotic coronary occlusion, 681

Beneficial effect of physical training on blood flow to myocardium perfused by chronic collaterals in the exercising dog, 575

Cardiac trauma from angiographic injections: a quantitative study, 91

Conditions for vasodilator-induced coronary steal in experimental myocardial ischemia, 1105

Coronary sinus reflux: a source of error in the measurement of thermodilution coronary sinus flow, 778

Early redistribution of thallium-201 after temporary ischemia, 332

Effect of nitroglycerin and arterial hypertension on myocardial blood flow following acute coronary artery occlusion in the dog, 557

Effects of a cardiac glycoside in combination with propranolol on the ischemic heart of conscious dogs, 568

Effects of acute cellular injury on coronary vascular reactivity in awake dogs, 962

Effects of dimethyl propranolol (UM-272; SC-27761) on myocardial ischemic injury in the canine heart after temporary coronary artery occlusion, 541

Electrophysiologic and hemodynamic effects of verapamil: correlation with plasma drug concentrations, 366

Etiology of the negative chronotropic responses to transient coronary artery occlusion in the anesthetized rhesus monkey, 756

Evaluation of methods for the quantification of experimental myocardial infarction, 35

Exercise-induced reduction in myocardial infarct size after coronary artery occlusion in the rat, 958

Failure of high doses of propranolol to reduce experimental myocardial ischemic damage, 534

Hemodynamic effects of intravenous sodium nitroprusside in the conscious dog, 144

Hemodynamic effects of nitroprusside and hydralazine in experimental cardiac tamponade, 563

Limitations of epicardial mapping as a guide to the surgical therapy of ventricular tachycardia, 666

Nonuniform cardiac sympathetic nerve discharge: mechanism for coronary occlusion and digitalis-induced arrhythmia, 1058

Normalization of bundle branch block patterns by distal His bundle pacing: clinical and experimental evidence of longitudinal dissociation in the pathologic His bundle, 473

Re-entrant ventricular arrhythmias in the late myocardial infarction period: 5. Mechanism of action of diphenylhydantoin, 465

Vectorcardiographic quantification of infarct size in baboons, 910

Anticardiac myosin antibody

Experimental myocardial infarct imaging following intravenous administration of iodine-131 labeled antibody (Fab')₂ fragments specific for cardiac myosin, 743

Anticoagulant therapy

Anticoagulant therapy and central nervous system complications in patients with prosthetic valve endocarditis, 1004

Antipyrene

Impairment of antipyrene clearance in humans by propranolol, 1161

Aorta

De subitaneis mortibus. XXIX. Randomly distributed focal myocardial lesions causing destruction in the His bundle or a narrow-origin left bundle branch, 816

Myocardium

Effects of reperfusion on the regional contraction of ischemic and nonischemic myocardium following partial coronary obstruction, 47

Mummification of the infarcted myocardium by high dose corticosteroids, 56

Myoglobin

Radioimmunoassay for human myoglobin: initial experience in patients with coronary heart disease, 52

N

Negative chronotropic responses

Etiology of the negative chronotropic responses to transient coronary artery occlusion in the anesthetized rhesus monkey, 756

Neural discharge

Nonuniform cardiac sympathetic nerve discharge: mechanism for coronary occlusion and digitalis-induced arrhythmia, 1058

Nifedipine

Nifedipine therapy for Prinzmetal's angina, 137

Nitroglycerin

Effect of nitroglycerin and arterial hypertension on myocardial blood flow following acute coronary artery occlusion in the dog, 557

Effect of nitroglycerin on exercise-induced abnormalities of left ventricular regional function and ejection fraction in coronary artery disease: assessment by radionuclide cineangiography in symptomatic and asymptomatic patients, 314

Effect of nitroprusside on regional myocardial blood flow in coronary artery disease: results in 25 patients and comparison with nitroglycerin, 732

Effects of sublingual nitroglycerin on resting pulmonary gas exchange and hemodynamics in man, 106

Regional myocardial wall thickening response to nitroglycerin: a predictor of myocardial response to aortocoronary bypass surgery, 952

Nitroglycerine

Conditions for vasodilator-induced coronary steal in experimental myocardial ischemia, 1103

Nitroprusside

Effect of nitroprusside on regional myocardial blood flow in coronary artery disease: results in 25 patients and comparison with nitroglycerin, 732

Hemodynamic effects of nitroprusside and hydralazine in experimental cardiac tamponade, 563

O

Obstruction, aortic

Cross-sectional echocardiographic characterization of aortic obstruction: 1. Supravalvular aortic stenosis and aortic hypoplasia, 491

Cross-sectional echocardiographic detection of aortic obstruction: 2. Coarctation of the aorta, 498

Obstruction, coronary

Effects of pharmacologically-induced hypertension on myocardial ischemia and coronary hemodynamics in patients with fixed coronary obstruction, 41

Effects of reperfusion on the regional contraction of ischemic and nonischemic myocardium following partial coronary obstruction, 47

Obstruction, outflow tract

Left ventricular outflow tract obstruction due to systolic anterior motion of the anterior mitral leaflet in patients with concentric left ventricular hypertrophy, 527

Postpericardiotomy syndrome

- Unexplained in-hospital fever following cardiac surgery: natural history, relationship to postpericardiotomy syndrome, and a prospective study of therapy with indomethacin versus placebo, 968

Prazosin

- Clinical use of prazosin in congestive heart failure. Letter, 200
- Comparison of effects of nitroprusside and prazosin on left ventricular function and the peripheral circulation in chronic refractory congestive heart failure, 152

Premature ventricular contractions

- Relationships among ventricular arrhythmias, coronary artery disease, angiographic and electrocardiographic indicators of myocardial fibrosis, 725

Prinzmetal's angina

- Nifedipine therapy for Prinzmetal's angina, 137

Procainamide

- Effects of procainamide on atrioventricular nodal reentrant paroxysmal tachycardia, 1171

Procaine

- Short-term intramuscular therapy with procaine penicillin plus streptomycin for infective endocarditis due to viridans streptococci, 1158

Propranolol

- Effects of a cardiac glycoside in combination with propranolol on the ischemic heart of conscious dogs, 568
- Effects of dimethyl propranolol (UM-272; SC-27761) on myocardial ischemic injury in the canine heart after temporary coronary artery occlusion, 541
- Efficacy of propranolol in the control of exercise-induced or augmented ventricular ectopic activity, 115
- Failure of high doses of propranolol to reduce experimental myocardial ischemic damage, 534
- Hemodynamic, reflexive, and metabolic alterations induced by acute and chronic timolol therapy in hypertensive man, 140
- Impairment of antipyrine clearance in humans by propranolol, 1161
- Reduction of enzyme levels by propranolol after acute myocardial infarction, 1091

Studies on the mechanism of sinus node dysfunction in the sick sinus syndrome, 217

Pulmonary artery pressure

Echocardiographic estimation of pulmonary artery pressure in transposition of the great arteries, 1151

Pulmonary hemodynamics and right ventricular function in hypertension, 1185

Pulmonary blood flow

Effects of sublingual nitroglycerin on resting pulmonary gas exchange and hemodynamics in man, 106

Pulmonary edema

Blood volume prior to and following treatment of acute cardiogenic pulmonary edema, 349

Pulmonary gas exchange

Effects of sublingual nitroglycerin on resting pulmonary gas exchange and hemodynamics in man, 106

Pulmonary vascular bed

Assessment of the pulmonary vascular bed by echocardiographic right ventricular systolic time intervals, 939

Q

QT interval

De subitaneis mortibus. XXX. Observations on the pathophysiology of the long QT syndromes with special reference to the neuropathology of the heart, 1221

Q-T interval prolongation as predictor of sudden death in patients with myocardial infarction, 1074

Quadriplegic patients

Hypertensive crises in quadriplegic patients: changes in cardiac output, blood volume, serum dopamine- β -hydroxylase activity, and arterial prostaglandin PGE₂, 336

R

R wave amplitude changes

Evaluation of R wave amplitude changes versus ST-segment depression in stress testing, 904

Radioactive tracer techniques

Evaluation of cardiac function and structure with radioactive tracer techniques, 645

Experimental myocardial infarct imaging following intravenous administration of iodine-131 labeled antibody (Fab')₂ fragments specific for cardiac myosin, 743

Radiography

Guide to the radiographic identification of prosthetic heart valves, 613

Migratory traumatic cardiovascular foreign bodies, 186

Radioimmunoassay

Radioimmunoassay for human myoglobin: initial experience in patients with coronary heart disease, 52

Radionuclide cineangiography

Effect of nitroglycerin on exercise-induced abnormalities of left ventricular regional function and ejection fraction in coronary artery disease: assessment by radionuclide cineangiography in symptomatic and asymptomatic patients, 314

Evaluation of left ventricular function (ejection fraction and segmental wall motion) by single pass radioisotope angiography, 326

Radionuclide imaging. Letter, 841

Re-entry

Continuous local electrical activity: a mechanism of recurrent ventricular tachycardia, 659

Effects of procainamide on atrioventricular nodal reentrant paroxysmal tachycardia, 1171

Re-entrant ventricular arrhythmias in the late myocardial infarction period: 5. Mechanism of action of diphenylhydantoin, 465

Recurrent sustained ventricular tachycardia: 1. Mechanisms, 431

Reflexive responses

Hemodynamic, reflexive, and metabolic alterations induced by acute and chronic timolol therapy in hypertensive man, 140

Regurgitation, aortic

Comparison between apexcardiographic and internal indexes of left ventricular performance in patients with aortic incompetence, 692

Regurgitation, mitral

Posterior left atrial echocardiogram of mitral regurgitation, 1134

Two-dimensional echocardiographic recognition of ruptured chordae tendineae, 244

Regurgitation, pulmonary

Murmur of pulmonic regurgitation in tetralogy of Fallot with absent pulmonic valve, 986

Regurgitation, tricuspid

Detection of tricuspid regurgitation with two-dimensional echocardiography and peripheral vein injections, 128

Reperfusion

Effects of reperfusion on the regional contraction of ischemic and nonischemic myocardium following partial coronary obstruction, 47

Repolarization abnormalities

Repolarization abnormalities in survivors of out-of-hospital ventricular fibrillation, 654

Respiration, phasic

Effect of phasic respiration on left ventricular dimension and performance in a normal population: an echocardiographic study, 122

Rheumatic heart disease

Active valvulitis associated with chronic rheumatic valvular disease and active myocarditis, 181

Aschoff bodies at necropsy in valvular heart disease: evidence from an analysis of 543 patients over 14 years of age that rheumatic heart disease, at least anatomically, is a disease of the mitral valve, 803

Right ventricle

Assessment of the pulmonary vascular bed by echocardiographic right ventricular systolic time intervals, 939

Combined double chambered right ventricle and discrete subaortic stenosis, 299

Inexcitable right ventricle and bilateral bundle branch block in Uhl's disease, 636

Noninvasive diagnosis of right ventricular infarction, 483

Pulmonary hemodynamics and right ventricular function in hypertension, 1185

Right and left ventricular volume characteristics in common atrioventricular canal, 991

Right ventricular ejection fraction in patients with acute anterior and inferior myocardial infarction assessed by radionuclide angiography, 1078

Right ventricular tumors. Letter and response, 401

Risk factors

A.H.A. Report of Ad Hoc Committee on Cigarette Smoking and Cardiovascular Diseases, 406A

A.H.A. Special Report: Report of the Ad Hoc Committee on Cigarette Smoking and Cardiovascular Diseases for Health Professionals, 404A

Age and relationship between coronary artery disease and plasma lipids. Letter, 1233

Cardiovascular disease risk factor variables at the preschool age: the Bogalusa Heart Study, 603

Familial recurrence of congenital heart diseases. Letter and response, 1233

Risk factors and high density lipoproteins. Letter and response, 1032

S

Saralasin

Hemodynamic correlates of saralasin-induced arterial pressure changes, 373

Pressor response to saralasin (1-sar-8-Ala-Angiotensin II) bolus injection in hypertensive patients, 1165

Scintigraphy

- Clinical estimation of acute myocardial infarct size with ^{99m}technetium pyrophosphate scintigraphy, 307
- Effect of nitroglycerin on exercise-induced abnormalities of left ventricular regional function and ejection fraction in coronary artery disease: assessment by radionuclide cineangiography in symptomatic and asymptomatic patients, 314
- Experimental myocardial infarct imaging following intravenous administration of iodine-131 labeled antibody (Fab')₂ fragments specific for cardiac myosin, 743
- Myocardial perfusion scintigraphy in patients with mitral valve prolapse: its advantage over stress electrocardiography in diagnosing associated coronary artery disease and its implications for the etiology of chest pain, 19
- Noninvasive diagnosis of right ventricular infarction, 433
- Prognostic implications of acute myocardial infarct scintigraphy with ^{99m}Tc-pyrophosphate, 320
- Thallium-201 scintigraphy in unstable angina pectoris, 738

Scleroderma

- Cryoablation of drug-resistant ventricular tachycardia in a patient with a variant of scleroderma, 190

Second heart sound

- Exploration of the cause of the low intensity aortic component of the second heart sound in nonhypertensive patients with poor ventricular performance, 590

Septal thickening

- Disproportionate ventricular septal thickening in the developing normal human heart, 520
- Prevalence and characteristics of disproportionate ventricular septal thickening in patients with coronary artery disease, 250
- Systolic anterior motion of the mitral valve in the absence of asymmetric septal hypertrophy, 256

Septum

- Determinants of growth in patients with ventricular septal defect, 793
- Echocardiographic assessment of left ventricular filling and septal and posterior wall dynamics in idiopathic hypertrophic subaortic stenosis, 512
- Echocardiographic features of the interventricular septum in chronic constrictive pericarditis, 1154
- Recurrent sustained ventricular tachycardia: 2. Endocardial mapping, 440

Serum lipids

- Effectiveness of unsupervised and supervised high intensity physical training in normalizing serum lipids in men with type IV hyperlipoproteinemia, 172

Sick sinus syndrome

- Etiology of the negative chronotropic responses to transient coronary artery occlusion in the anesthetized rhesus monkey, 756
- Studies on the mechanism of sinus node dysfunction in the sick sinus syndrome, 217

Sinus node

- Electrophysiologic effects of lidocaine on sinus node and atrium in patients with and without sinoatrial dysfunction, 448
- Prolonged atrial conduction: a major predisposing factor for the development of atrial flutter, 213

Sodium nitroprusside

- Comparison of effects of nitroprusside and prazosin on left ventricular function and the peripheral circulation in chronic refractory congestive heart failure, 152
- Hemodynamic effects of intravenous sodium nitroprusside in the conscious dog, 144

Spectral energy

- Spectral energy of the first heart sound in acute myocardial ischemia: a correlation with electrocardiographic, hemodynamic and wall motion abnormalities, 593

ST segment

- Comparison of the electrocardiographic changes induced by maximum exercise testing with treadmill and cycle ergometer, 1066

Evaluation of R wave amplitude changes versus ST-segment depression in stress testing, 904

Precordial electrocardiographic mapping: a technique to assess the efficacy of interventions designed to limit infarct size, 1

Variability, reproducibility, and applications of precordial ST-segment mapping following acute myocardial infarction, 1096

Statistical measures

- Relative importance of *Ps* and *rs*. Letter and response, 1232

Stenosis

- Aortic stenosis in children: experience with echocardiographic prediction of severity, 263
- Assessing the severity of mitral stenosis. Letter, 1235
- Bruit of carotid stenosis versus radiated basal heart murmurs: differentiation by phonangiography, 975
- Calcific deposits in stenotic mitral valves: extent and relation to age, sex, degree of stenosis, cardiac rhythm, previous commissurotomy and left atrial body thrombus from study of 164 operatively-excised valves, 808
- Cross-sectional echocardiographic characterization of aortic obstruction: 1. Supravalvular aortic stenosis and aortic hypoplasia, 491
- Echocardiographic assessment of left ventricular filling and septal and posterior wall dynamics in idiopathic hypertrophic subaortic stenosis, 512
- Left main coronary artery stenosis: the influence of aorto-coronary bypass surgery on survival, 1111
- Long-term clinical course and symptomatic status of patients after operation for hypertrophic subaortic stenosis, 1205
- Noninvasive study of early diastole in mitral stenosis, 708
- Prognostic spectrum of left main stenosis, 947
- Reduced left ventricular myocardial blood flow per unit mass in aortic stenosis, 582

Streptomycin

- Short-term intramuscular therapy with procaine penicillin plus streptomycin for infective endocarditis due to viridans streptococci, 1158

Subaortic stenosis

- Combined double chambered right ventricle and discrete subaortic stenosis, 299

Sudden death

- De subitaneis mortibus. XXVIII. Apoplexy of the heart, 385
- De subitaneis mortibus. XXX. Observations on the pathophysiology of the long QT syndromes with special reference to the neuropathology of the heart, 1221
- De subitaneis mortibus. XXIX. Randomly distributed focal myocardial lesions causing destruction in the His bundle or a narrow-origin left bundle branch, 816
- Q-T interval prolongation as predictor of sudden death in patients with myocardial infarction, 1074

Suprasternal notch

- Suprasternal notch echocardiography. Letter and response, 1232

Supravalvular aortic stenosis

- Cross-sectional echocardiographic characterization of aortic obstruction: 1. Supravalvular aortic stenosis and aortic hypoplasia, 491

Symmetrical ventricular hypertrophy

- Symmetrical ventricular hypertrophy. Letter and response, 1031

Sympathetic nerve, cardiac

- Nonuniform cardiac sympathetic nerve discharge: mechanism for coronary occlusion and digitalis-induced arrhythmia, 1058

Systolic motion

- Systolic anterior motion. Letter and response, 403

Systolic time intervals

- Systolic time intervals. Letter and response, 200
- Systolic time intervals. Letter and response, 1032

T

Tachycardia

- Characteristics of atrioventricular conduction and the spectrum of arrhythmias in Lown-Ganong-Levine syndrome, 454
- Clinical significance of ventricular tachycardia (3 beats or

- longer) detected during ambulatory monitoring after myocardial infarction, 890
- Continuous local electrical activity: a mechanism of recurrent ventricular tachycardia, 659
- Cryoablation of drug-resistant ventricular tachycardia in a patient with a variant of scleroderma, 190
- Determinants of the antegrade echo zone in the Wolff-Parkinson-White syndrome, 671
- Effects of procainamide on atrioventricular nodal reentrant paroxysmal tachycardia, 1171
- George C. Griffith Lecture: Value and limitations of programmed electrical stimulation of the heart in the study and treatment of ventricular tachycardias, 845
- Limitations of epicardial mapping as a guide to the surgical therapy of ventricular tachycardia, 666
- Paroxysmal supraventricular tachycardia in patients with mitral valve prolapse, 111
- Recurrent sustained ventricular tachycardia: 1. Mechanisms, 431
- Recurrent sustained ventricular tachycardia: 2. Endocardial mapping, 440
- Takayasu's disease**
- Natural history and classification of occlusive thromboangiopathy (Takayasu's disease), 27
- Tamponade**
- Hemodynamic effects of nitroprusside and hydralazine in experimental cardiac tamponade, 563
- Pericardial constriction. Letter, 1235
- Technetium-99m pyrophosphate**
- Clinical estimation of acute myocardial infarct size with ^{99m}technetium pyrophosphate scintigraphy, 307
- Experimental myocardial infarct imaging following intravenous administration of iodine-131 labeled antibody (Fab')₂ fragments specific for cardiac myosin, 743
- Prognostic implications of acute myocardial infarct scintigraphy with ^{99m}Tc-pyrophosphate, 320
- Radionuclide imaging. Letter, 841
- Tetralogy of Fallot**
- Left ventricular function following attempted surgical repair of tetralogy of Fallot, 798
- Murmur of pulmonic regurgitation in tetralogy of Fallot with absent pulmonic valve, 986
- Thallium-201**
- Early redistribution of thallium-201 after temporary ischemia, 332
- Thallium-201 scintigraphy in unstable angina pectoris, 738
- Reduction of coronary blood flow during coronary artery spasm occurring spontaneously and after provocation by ergonovine maleate, 392
- Thromboangiopathy**
- Natural history and classification of occlusive thromboangiopathy (Takayasu's disease), 27
- Timolol**
- Effect of timolol plus hydrochlorothiazide plus hydralazine on essential hypertension, 1017
- Hemodynamic, reflexive, and metabolic alterations induced by acute and chronic timolol therapy in hypertensive man, 140
- Tocainide**
- Clinical electrophysiologic effects of tocainide, 685
- Hemodynamic effects of intravenous tocainide in patients with heart disease, 787
- Long-term tocainide therapy for ventricular arrhythmias, 1008
- Transposition of the great arteries**
- Clinical, angiographic, and hemodynamic assessment of late results after Mustard operation, 1214
- Echocardiographic and hemodynamic correlation in transposition of the great arteries, 291
- Echocardiographic estimation of pulmonary artery pressure in transposition of the great arteries, 1151
- Trauma**
- Cardiac trauma from angiographic injections: a quantitative study, 91
- Migratory traumatic cardiovascular foreign bodies, 186

Tumors

- Right ventricular tumors. Letter and response, 401

U**Uhl's disease**

- Inexcitable right ventricle and bilateral bundle branch block in Uhl's disease, 636

Ultrasound

- Ultrasound system for combined cardiac imaging and Doppler blood flow measurement in man, 925

Ultrastructural heart abnormalities

- Ultrastructural basis for electrocardiographic alterations associated with Duchenne's progressive muscular dystrophy, 1122

V**Valsalva maneuver**

- Hemodynamic, reflexive, and metabolic alterations induced by acute and chronic timolol therapy in hypertensive man, 140

Valve, aortic

- Dissecting aortic aneurysm associated with congenital bicuspid aortic valve, 1022
- Echocardiographic diagnosis of ruptured aortic valve leaflet in bacterial endocarditis, 634

Valve, mitral

- Aschoff bodies *at necropsy* in valvular heart disease: evidence from an analysis of 543 patients over 14 years of age that rheumatic heart disease, at least anatomically, is a disease of the mitral valve, 803
- Calcific deposits in stenotic mitral valves: extent and relation to age, sex, degree of stenosis, cardiac rhythm, previous commissurotomy and left atrial body thrombus from study of 164 operatively-excised valves, 808
- Echocardiographic and hemodynamic correlation in transposition of the great arteries, 291
- Echocardiographic differentiation of partial and complete atrioventricular canal, 1144
- Left ventricular anomalies associated with Ebstein's malformation of the tricuspid valve, 303
- Long-term mitral valve replacement in young children: influence of somatic growth on prosthetic valve adequacy, 981
- Myocardial perfusion scintigraphy in patients with mitral valve prolapse: its advantage over stress electrocardiography in diagnosing associated coronary artery disease and its implications for the etiology of chest pain, 19
- Paroxysmal supraventricular tachycardia in patients with mitral valve prolapse, 111
- Prediction of late survival in patients with mitral valve disease from clinical, hemodynamic, and quantitative angiographic variables, 341
- Systolic anterior motion of the mitral valve in the absence of asymmetric septal hypertrophy, 256
- Two-dimensional echocardiographic recognition of ruptured chordae tendineae, 244

Valve, prosthetic

- Anticoagulant therapy and central nervous system complications in patients with prosthetic valve endocarditis, 1004
- Guide to the radiographic identification of prosthetic heart valves, 613
- Long-term mitral valve replacement in young children: influence of somatic growth on prosthetic valve adequacy, 981

Valve, pulmonary

- Absent pulmonary valve syndrome: considerations of management, 159
- Murmur of pulmonic regurgitation in tetralogy of Fallot with absent pulmonic valve, 986

Valve, tricuspid

- Absent tricuspid valve with aortic atresia in mixed levocardia (atria situs solitus, L-loop): a hitherto undescribed entity, 836

- Left ventricular anomalies associated with Ebstein's malformation of the tricuspid valve, 303
- Valvulitis**
Active valvulitis associated with chronic rheumatic valvular disease and active myocarditis, 181
- Vasospasm**
Coronary arterial spasm in acute myocardial infarction. Letter, 841
Spasm. Letters and response, 1034
- Vectorcardiographic quantification**
Vectorcardiographic quantification of infarct size in baboons, 910
- Vein, coronary**
Atrial pacing from the coronary vein: ten year experience in 50 patients with implanted pervenous pacemakers, 103
- Vein, jugular**
Transcutaneous Doppler jugular venous flow velocity recording: clinical and hemodynamic correlates, 930
- Venous congestion**
Effects of short-term venous congestion on forearm venous volume and reactive hyperemia blood flow in human subjects, 1001
- Ventricle, single**
Reliability and practicality of single crystal echocardiography in the evaluation of single ventricle: angiographic and pathological correlates, 269
- Ventricular compliance**
Ventricular compliance. Letter and response, 1234
- Ventricular ectopic beats**
Antiarrhythmic drug effect mimicked by spontaneous variability of ventricular ectopy, 1116
Efficacy of propranolol in the control of exercise-induced or augmented ventricular ectopic activity, 115
- Ventricular fibrillation**
Repolarization abnormalities in survivors of out-of-hospital ventricular fibrillation, 654
- Ventricular premature depolarizations**
Recurrent sustained ventricular tachycardia: 1. Mechanisms, 431
- Ventricular septal defect**
Absent pulmonary valve syndrome: considerations of management, 159
Anomalous origin of left coronary artery from the pulmonary artery with ventricular septal defect, 1026
Criss-cross heart with concordant atrioventriculo-arterial connections, 396
Determinants of growth in patients with ventricular septal defect, 793
- Ventricular septal thickening**
Disproportionate ventricular septal thickening in the developing normal human heart, 520
- Verapamil**
Electrophysiologic and hemodynamic effects of verapamil: correlation with plasma drug concentrations, 366
Verapamil in the management of supraventricular tachyarrhythmias occurring after a recent myocardial infarction, 751
- Volume alteration**
Effect of volume alterations on norepinephrine and dopamine- β -hydroxylase in normotensive and hypertensive subjects, 774
- W**
- Wall dynamics**
Echocardiographic assessment of left ventricular filling and septal and posterior wall dynamics in idiopathic hypertrophic subaortic stenosis, 512
Evaluation of left ventricular function (ejection fraction and segmental wall motion) by single pass radioisotope angiography, 326
Physiologic improvement following coronary artery bypass surgery, 831
Spectral energy of the first heart sound in acute myocardial ischemia: a correlation with electrocardiographic, hemodynamic and wall motion abnormalities, 593
- Wall thickness**
Aortic stenosis in children: experience with echocardiographic prediction of severity, 263
Cardiac function in the normal newborn: additional information by computer analysis of the M-mode echocardiogram, 1198
Detection of myocardial scar tissue by M-mode echocardiography, 230
Left ventricular outflow tract obstruction due to systolic anterior motion of the anterior mitral leaflet in patients with concentric left ventricular hypertrophy, 527
Posterior left atrial echocardiogram of mitral regurgitation, 1134
Prevalence and characteristics of disproportionate ventricular septal thickening in patients with coronary artery disease, 250
Regional myocardial wall thickening response to nitroglycerin: a predictor of myocardial response to aortocoronary bypass surgery, 952
Systolic anterior motion of the mitral valve in the absence of asymmetric septal hypertrophy, 256
- Wolff-Parkinson-White syndrome**
Anatomical substrates of Wolff-Parkinson-White syndrome: a clinicopathologic correlation in seven patients, 870
Determinants of the antegrade echo zone in the Wolff-Parkinson-White syndrome, 671
Epicardial mapping in the Wolff-Parkinson-White syndrome, 854
George C. Griffith Lecture: Value and limitations of programmed electrical stimulation of the heart in the study and treatment of tachycardias, 845
Paroxysmal supraventricular tachycardia in patients with mitral valve prolapse, 111
- Women**
Maximal heart rate and treadmill performance of healthy women in relation to age, 79

SUBJECT INDEX

A

Acromegaly

Acromegaly and the heart. Letter, 757

Alcoholic heart disease

Cardiac metabolism: its contributions to alcoholic heart disease and myocardial failure, 965

Aneurysm

Aortic infarction following dissecting aortic aneurysm, 876
ST segment changes post-infarction: predictive value for multi-vessel coronary disease and left ventricular aneurysm, 887
Ventriculographic features predictive of surgical outcome for left ventricular aneurysm, 1167

Angina pectoris

Changes in exercise coronary sinus blood flow with training in patients with angina pectoris, 41
Severe aortic stenosis with impaired left ventricular function and clinical heart failure: results of valve replacement, 255

Angina, Prinzmetal's variant

Coronary arterial spasm and Prinzmetal's variant form of angina induced by hyperventilation and tris-buffer infusion, 56
Hemodynamic and myocardial metabolic effects of ergonovine in patients with chest pain, 648

Angina, unstable

Emergency revascularization for unstable angina, 1163

Angiography

Assessment of cardiac performance with quantitative radionuclide angiocardiology. Effects of oral propranolol on global and regional left ventricular function in coronary artery disease, 808
Asymptomatic coronary artery disease: angiographic assessment of diabetics evaluated for renal transplantation, 1184
Changes in exercise coronary sinus blood flow with training in patients with angina pectoris, 41
Correlation of angiographic and autopsy left ventricular dimensions in children, 739
Detection of coronary heart disease using radionuclide determined regional ejection fraction at rest and during handgrip exercise: correlation with coronary arteriography, 640
Diastolic left ventricular pressure-volume and stress-strain relations in patients with valvular aortic stenosis and left ventricular hypertrophy, 77
Early intraaortic balloon pumping for anterior myocardial infarction without shock, 204
Hemodynamic and myocardial metabolic effects of ergonovine in patients with chest pain, 648
Hemodynamically significant anomalies of the coronary arteries — angiographic aspects, 25
Identification and description of separate mechanisms for two components of Renografin cardiotoxicity, 520
Magnification pulmonary wedge angiography in the evaluation of children with congenital heart disease and pulmonary hypertension, 1094
Radiation exposure to the operator performing cardiac angiography with U-arm systems, 925
Visualization of the pulmonary arteries in pseudotruncus by pulmonary vein wedge angiography, 140

Angiotensin

Angiotensin converting enzyme inhibition in patients with congestive heart failure, 770
Role of the renin-angiotensin system in the systemic vasoconstriction of chronic congestive heart failure, 763

Anorexia nervosa

Effects of self-induced starvation on cardiac size and function in anorexia nervosa, 425

Anterior loop

Differentiation of posterior myocardial infarction from right

ventricular hypertrophy and normal anterior loop by echocardiography, 1057

Aorta

Anomalous aortic origin of coronary arteries, 606
Aortic infarction following dissecting aortic aneurysm, 876
Aortic input impedance in heart failure, 460
Aortic stenosis with heart failure. Letter, 961
Diastolic left ventricular pressure-volume and stress-strain relations in patients with valvular aortic stenosis and left ventricular hypertrophy, 77
Effect of preoperative ejection fraction on survival and hemodynamic improvement following aortic valve replacement, 1175
Effects of self-induced starvation on cardiac size and function in anorexia nervosa, 425
The morphologic spectrum of double outlet left ventricle and its surgical significance, 558
Noninvasive assessment of left ventricular function from the mitral valve echogram. Relation of final anterior mitral leaflet closing velocity to peak dp/dt and aortic velocity, 861
Platelet aggregation in aortic and coronary venous blood in patients with and without coronary disease. 3. Role of tachycardia stress and propranolol, 881
Severe aortic stenosis with impaired left ventricular function and clinical heart failure: results of valve replacement, 255

Arrhythmia

A chronically implanted system for automatic defibrillation in active conscious dogs. Experimental model for treatment of sudden death from ventricular fibrillation, 90
Dual echocardiographic determination of atrial contraction sequence in atrial flutter and other related atrial arrhythmias, 314
Electrode-catheter arrhythmia induction in the selection and assessment of antiarrhythmic drug therapy in recurrent ventricular tachycardia, 971
Limitations of routine long-term ambulatory electrocardiographic monitoring to assess ventricular ectopic frequency, 408
Recurrent sustained ventricular tachycardia. 3. Role of the electrophysiologic study in selection of antiarrhythmic regimens, 986
Reentrant ventricular arrhythmias in the late myocardial infarction period. 6. Effect of the autonomic system, 103
Should lidocaine be administered routinely to all patients after acute myocardial infarction? 581

Artery, coronary

Anomalous aortic origin of coronary arteries, 606
Asymptomatic coronary artery disease: angiographic assessment of diabetics evaluated for renal transplantation, 1184
Beneficial actions of N-dimethyl propranolol on myocardial oxygen balance and transmural infusion gradients distal to a severe coronary artery stenosis in the canine heart, 663
Coronary arterial spasm and Prinzmetal's variant form of angina induced by hyperventilation and tris-buffer infusion, 56
Early imaging of experimental myocardial infarction by intracoronary administration of ¹²⁵I-labelled anticardiac myosin (Fab')₂ fragments, 1137
Emergency revascularization for unstable angina, 1163
Hemodynamically significant anomalies of the coronary arteries — angiographic aspects, 25
Left ventricular function following coronary bypass surgery, 63
A multivariate approach for interpreting treadmill exercise tests in coronary artery disease, 505

Artery, pulmonary

Cardiac tamponade: hemodynamic observations in man, 265
Hemodynamically significant anomalies of the coronary arteries — angiographic aspects, 25

- Lung biopsy in congenital heart disease: a morphometric approach to pulmonary vascular disease, 1107
- Magnification pulmonary wedge angiography in the evaluation of children with congenital heart disease and pulmonary hypertension, 1094
- Physiologic correlates and echocardiographic pulmonary valve motion in diastole, 1064
- Real-time cross-sectional echocardiographic imaging and measurement of the patent ductus arteriosus in infants and children, 343
- Visualization of the pulmonary arteries in pseudotruncus by pulmonary vein wedge angiography, 140

Aspirin

- A case-control study of regular aspirin use and coronary deaths, 35
- Editorial: aspirin and coronary deaths, 39

Asymmetric septal hypertrophy

- Catenoid shape of the interventricular septum: possible cause of idiopathic hypertrophic subaortic stenosis, 392
- Editorial: myocardial fiber disarray and ventricular septal hypertrophy in asymmetrical hypertrophy of the heart, 398
- Septal-free wall disproportion in inferior infarction: the echocardiographic differentiation from hypertrophic cardiomyopathy, 700

Asynergy

- Relationship between regional myocardial perfusion and the presence, severity and reversibility of asynergy in patients with coronary heart disease, 789
- Relationship of regional myocardial perfusion to segmental wall motion. A physiologic basis for understanding the presence and reversibility of asynergy, 1154

Atherosclerosis

- Association between coronary heart disease and the C3^F-gene in essential hypertension, 622
- Asymptomatic coronary artery disease: angiographic assessment of diabetics evaluated for renal transplantation, 1184
- Type A behavior pattern and coronary atherosclerosis, 634

Atresia

- Clinical use of blade atrial septostomy, 600
- Hemodynamically significant anomalies of the coronary arteries — angiographic aspects, 25
- Visualization of the pulmonary arteries in pseudotruncus by pulmonary vein wedge angiography, 140

Atrial depolarization wave

- Multicentric origin of the atrial depolarization wave — the pacemaker complex. Relation to dynamics of atrial conduction, P-wave changes and heart rate control, 1036

Atrial flutter

- Dual echocardiographic determination of atrial contraction sequence in atrial flutter and other related atrial arrhythmias, 314

Atrial pacing

- Electrophysiological demonstration of concealed conduction in the human atrium, 940
- A new method for measurement of sinoatrial conduction time, 706

Atrioventricular block

- Clinical and electrophysiologic findings in patients with paroxysmal slowing of sinus rate and apparent Mobitz type II atrioventricular block, 305
- The clinical significance of bundle branch block complicating acute myocardial infarction. 1. Clinical characteristics, determinants of mortality and one-year follow-up, 679
- The clinical significance of bundle branch block complicating acute myocardial infarction. 2. Indications for temporary and permanent pacemaker insertion, 689

Atrioventricular canal, common

- Complete common atrioventricular canal in infancy — surgical repair and postoperative hemodynamics, 550
- Determinants of atrioventricular reentrant paroxysmal tachycardia in patients with Wolff-Parkinson-White syndrome, 415
- Lung biopsy in congenital heart disease: a morphometric approach to pulmonary vascular disease, 1107
- Ventricular volume characteristics in infants and children with endocardial cushion defects, 153

B**Balloon pumping**

- Early intraaortic balloon pumping for anterior myocardial infarction without shock, 204
- Editorial: preservation of ischemic myocardium with intraaortic balloon pumping: modern therapeutic imperative or *primum non nocere*? 211
- Intraortic balloon pumping. Letter and response, 1212

Bartter's syndrome

- Effects of indomethacin on the vascular abnormalities of Bartter's syndrome, 544

Beriberi

- Fulminant beriberi heart disease with lactic acidosis: presentation of a case with evaluation of left ventricular function and review of pathophysiologic mechanisms, 566

Blade atrial septostomy

- Clinical use of blade atrial septostomy, 600

Blood flow

- Beneficial actions of N-dimethyl propranolol on myocardial oxygen balance and transmural infusion gradients distal to a severe coronary artery stenosis in the canine heart, 663
- The Björk-Shiley aortic prosthesis: flow characteristics, thrombus formation and tissue overgrowth, 70
- Changes in exercise coronary sinus blood flow with training in patients with angina pectoris, 41
- Effect of sublingual nitroglycerin on regional flow in patients with and without coronary disease, 803
- Electrophysiologic effects of partial coronary flow reduction in the exposed canine heart. Effects of ischemia and ischemic-induced regional hypothermia on refractoriness and conduction delay, 670
- In vivo validation of a thermodilution method to determine regional left ventricular blood flow in patients with coronary disease, 795
- Magnification pulmonary wedge angiography in the evaluation of children with congenital heart disease and pulmonary hypertension, 1094
- Primary hypertension refractory to triple drug treatment: a study on central and peripheral hemodynamics, 615
- Reduced LV myocardial blood flow. Letter and response, 573
- Stroke volume calculated from the mitral valve echogram in patients with and without ventricular dyssynergy, 125
- Systemic and regional hemodynamics in low, normal and high cardiac borderline hypertension, 441

Blood pressure studies

- Arterial insufficiency of the hand evaluated by digital blood pressure and arteriographic findings, 902
- Primary hypertension refractory to triple drug treatment: a study on central and peripheral hemodynamics, 615
- Stability of blood pressure rank and urinary kallikrein concentration in childhood: an eight-year follow-up, 908
- Tracking of blood lipids and blood pressures in school-age children: the Muscatine Study, 626

Bradycardia

- Effects of self-induced starvation on cardiac size and function in anorexia nervosa, 425
- Reentrant ventricular arrhythmias in the late myocardial infarction period. 6. Effect of the autonomic system, 103

Bundle branch block

- The clinical significance of bundle branch block complicating acute myocardial infarction. 1. Clinical characteristics, determinants of mortality and one-year follow-up, 679
- The clinical significance of bundle branch block complicating acute myocardial infarction. 2. Indications for temporary and permanent pacemaker insertion, 689
- Reentry within the His-Purkinje system: elucidation of reentrant circuit utilizing right bundle branch and His bundle recordings, 295

Bypass surgery

- Aortocoronary bypass grafting. Letter and response, 575
- Contraction band necrosis. Letter and response, 1212
- The effect of free fatty acids on myocardial oxygen consumption during atrial pacing and catecholamine infusion in man, 484

- Hemodynamic effects of preload and sodium nitroprusside in patients subjected to coronary bypass surgery, 815
- Left ventricular function following coronary bypass surgery, 63
- MI after CABG. Letter and response, 191
- Pressure-flow characteristics of the coronary collateral circulation during cardiopulmonary bypass: effects of ventricular fibrillation, 233
- Severe aortic stenosis with impaired left ventricular function and clinical heart failure: results of valve replacement, 255
- Surgery using cardiopulmonary bypass in the elderly, 250

C

C3^F allele

- Association between coronary heart disease and the C3^F-gene in essential hypertension, 622

Calcium levels

- Alterations in calcium levels of coronary sinus blood during coronary arteriography in the dog, 512
- Identification and description of separate mechanisms for two components of Renografin cardiotoxicity, 520

Cardiac myosin light chains

- Detection of serum cardiac myosin light chains in acute experimental myocardial infarction: radioimmunoassay of cardiac myosin light chains, 1130

Cardiac output

- Effects of a natural volume overload state (pregnancy) on left ventricular performance in normal human subjects, 434
- Hemodynamic effects of intravenous phenolamine in low output cardiac failure. Dose-response relationships, 157
- Primary hypertension refractory to triple drug treatment: a study on central and peripheral hemodynamics, 615
- Role of the renin-angiotensin system in the systemic vasoconstriction of chronic congestive heart failure, 763
- Stroke volume calculated from the mitral valve echogram in patients with and without ventricular dyssynergy, 125
- Systemic and regional hemodynamics in low, normal and high cardiac borderline hypertension, 441

Cardiac tamponade

- Cardiac tamponade: hemodynamic observations in man, 265

Cardiomyopathy

- Beneficial effect of Salbutamol on cardiac function in severe congestive cardiomyopathy. Effect on systolic and diastolic function of the left ventricle, 449
- Comparative systemic and regional hemodynamic effects of dopamine and dobutamine in patients with cardiomyopathic heart failure, 466
- Electrocardiographic findings in patients with obstructive and nonobstructive hypertrophic cardiomyopathy, 402

Cardiotoxicity

- Identification and description of separate mechanisms for two components of Renografin cardiotoxicity, 520

Cat studies

- Disparate electrophysiological alterations accompanying dysrhythmia due to coronary occlusion and reperfusion in the cat, 1023
- Effect of potassium cardioplegia on myocardial ischemia and post arrest ventricular function, 240

Catecholamines

- Contraction band necrosis. Letter and response, 1212
- The effect of free fatty acids on myocardial oxygen consumption during atrial pacing and catecholamine infusion in man, 484

Catheterization

- The cardiology center. Letter and response, 1213
- Changes in exercise coronary sinus blood flow with training in patients with angina pectoris, 41
- Clinical use of blade atrial septostomy, 600
- A conductive catheter to improve patient safety during cardiac catheterization, 1190
- The development of pulmonary vascular obstructive disease after successful Mustard operation in early infancy, 181
- Early imaging of experimental myocardial infarction by intra-

coronary administration of ¹²⁵I-labelled anticardiac myosin (Fab')₂ fragments, 1137

Echocardiographic evaluation of intracardiac pacing catheters: M-mode and two-dimensional studies, 1049

Physician and patient exposure during cardiac catheterization, 134

Radiation exposure during cardiac catheterization. Letter and response, 1213

Radiation exposure to the operator performing cardiac angiography with U-arm systems, 925

Stroke volume calculated from the mitral valve echogram in patients with and without ventricular dyssynergy, 125

Temporary, catheter-induced block in accessory pathways, 932

Ventricular volume characteristics in infants and children with endocardial cushion defects, 153

Chest pain

Cardiac manifestations of malignant hyperthermia susceptibility, 916

Hemodynamic and myocardial metabolic effects of ergonovine in patients with chest pain, 648

Children

A.H.A. committee report: value and safety of diet modification to control hyperlipidemia in childhood and adolescence — a statement for physicians, 381A

Correlation of angiographic and autopsy left ventricular dimensions in children, 739

Diagnosis of ventricular septal defect by pulsed Doppler echocardiography — sensitivity, specificity and limitations, 322

Fibrolipoma of the mitral valve in a child: clinical and echocardiographic features, 955

Magnification pulmonary wedge angiography in the evaluation of children with congenital heart disease and pulmonary hypertension, 1094

Real-time cross-sectional echocardiographic imaging and measurement of the patent ductus arteriosus in infants and children, 343

Stability of blood pressure rank and urinary kallikrein concentration in childhood: an eight-year follow-up, 908

Systolic time intervals in children: normal standards for clinical use, 1123

Tracking of blood lipids and blood pressures in school-age children: the Muscatine Study, 626

Use of contrast echocardiography for evaluation of right ventricular hemodynamics in the presence of ventricular septal defects, 327

Ventricular volume characteristics in infants and children with endocardial cushion defects, 153

Cholestyramine

Decreased bioavailability of digoxin due to hypercholesterolemic interventions, 164

Effects of dietary and pharmacologic alteration of serum lipids on platelet survival time, 365

Cinearteriography

Alterations in calcium levels of coronary sinus blood during coronary arteriography in the dog, 512

Coronary arterial spasm and Prinzmetal's variant form of angina induced by hyperventilation and tris-buffer infusion, 56

Circulation

Editorial: *Circulation*: the next five years, 1

Clinical trials

Editorial: why community physicians should encourage their patients to participate in randomized clinical trials, 963

Computed tomography

Computed tomography for localization and sizing of experimental acute myocardial infarction, 497

Myocardial infarct quantification in the dog by single photon emission computed tomography, 227

Conduction

Cardiac sarcoid: a clinicopathologic study of 84 unselected patients with systemic sarcoidosis, 1204

Congenital heart disease and intraventricular conduction defects. Letter, 759

Demonstration of intra-atrial conduction delay, block, gap and reentry: a report of two cases, 947

- Disparate electrophysiological alterations accompanying dysrhythmia due to coronary occlusion and reperfusion in the cat, 1023
- Double irregular ventricular parasystole: rate-dependent entrance block and "supernormal" exit conduction, 723
- Electrophysiological demonstration of concealed conduction in the human atrium, 940
- Multicentric origin of the atrial depolarization wave — the pacemaker complex. Relation to dynamics of atrial conduction, P-wave changes and heart rate control, 1036
- A new method for measurement of sinoatrial conduction time, 706
- Noninvasive recording of His-Purkinje activity in man by QRS-triggered signal averaging, 95
- Reentrant ventricular arrhythmias in the late myocardial infarction period. 6. Effect of the autonomic system, 103
- Temporary, catheter-induced block in accessory pathways, 932
- Congenital heart disease**
- Catenoid shape of the interventricular septum: possible cause of idiopathic hypertrophic subaortic stenosis, 392
- Complete common atrioventricular canal in infancy — surgical repair and postoperative hemodynamics, 550
- Congenital heart disease and intraventricular conduction defects. Letter, 759
- Correlation of angiographic and autopsy left ventricular dimensions in children, 739
- Editorial: myocardial fiber disarray and ventricular septal hypertrophy in asymmetrical hypertrophy of the heart, 398
- Isolated drainage of the superior vena cava into the left atrium in a 52-year-old man. A rare congenital malformation in the adult presenting with cyanosis, polycythemia, and an unsuccessful lung scan, 751
- Lung biopsy in congenital heart disease: a morphometric approach to pulmonary vascular disease, 1107
- Magnification pulmonary wedge angiography in the evaluation of children with congenital heart disease and pulmonary hypertension, 1094
- Models of congenital heart disease in fetal lambs, 354
- Multiple coronary arterioventricular fistulae, 178
- Staged surgical management of tetralogy of Fallot in infants, 837
- Contractility**
- Cardiac metabolism: its contributions to alcoholic heart disease and myocardial failure, 965
- The effect of exercise and atrial pacing on left ventricular volume and contractility in patients with innervated and denervated hearts, 476
- Relationship of regional myocardial perfusion to segmental wall motion. A physiologic basis for understanding the presence and reversibility of asynergy, 1154
- Contraction band necrosis**
- Contraction band necrosis. Letter and response, 1212
- Contrast material**
- Alterations in calcium levels of coronary sinus blood during coronary arteriography in the dog, 512
- Identification and description of separate mechanisms for two components of Renografin cardiotoxicity, 520
- Use of contrast echocardiography for evaluation of right ventricular hemodynamics in the presence of ventricular septal defects, 327
- Coronary anomalies**
- Anomalous aortic origin of coronary arteries, 606
- Coronary anomalies. Letter and response, 759
- Hemodynamically significant anomalies of the coronary arteries — angiographic aspects, 25
- Coronary artery disease**
- Assessment of cardiac performance with quantitative radionuclide angiocardiology. Effects of oral propranolol on global and regional left ventricular function in coronary artery disease, 808
- Asymptomatic coronary artery disease: angiographic assessment of diabetics evaluated for renal transplantation, 1184
- Comparison of single-dose and double-dose thallium-201 myocardial perfusion scintigraphy for the detection of coronary artery disease and prior myocardial infarction, 777
- The effect of free fatty acids on myocardial oxygen consumption during atrial pacing and catecholamine infusion in man, 484
- Effect of sublingual nitroglycerin on regional flow in patients with and without coronary disease, 803
- Emergency revascularization for unstable angina, 1163
- Hemodynamic and metabolic response after abrupt withdrawal of propranolol, 196
- Multiple coronary arterioventricular fistulae, 178
- A multivariate approach for interpreting treadmill exercise tests in coronary artery disease, 505
- Platelet aggregation in aortic and coronary venous blood in patients with and without coronary disease. 3. Role of tachycardia stress and propranolol, 881
- Severe aortic stenosis with impaired left ventricular function and clinical heart failure: results of valve replacement, 255
- ST segment changes post-infarction: predictive value for multivessel coronary disease and left ventricular aneurysm, 887
- Stroke volume calculated from the mitral valve echogram in patients with and without ventricular dyssynergy, 125
- Coronary collateral circulation**
- Pressure-flow characteristics of the coronary collateral circulation during cardiopulmonary bypass: effects of ventricular fibrillation, 233
- Coronary heart disease**
- Association between coronary heart disease and the C3^F-gene in essential hypertension, 622
- A case-control study of regular aspirin use and coronary deaths, 35
- Detection of coronary heart disease using radionuclide determined regional ejection fraction at rest and during handgrip exercise: correlation with coronary arteriography, 640
- Editorial: aspirin and coronary deaths, 39
- Life styles, major risk factors proof and public policy, 3
- Relationship between regional myocardial perfusion and the presence, severity and reversibility of asynergy in patients with coronary heart disease, 789
- Type A behavior pattern and coronary atherosclerosis, 634
- Coronary sinus**
- Alterations in calcium levels of coronary sinus blood during coronary arteriography in the dog, 512
- Assessment of cardiac performance with quantitative radionuclide angiocardiology. Effects of oral propranolol on global and regional left ventricular function in coronary artery disease, 808
- Changes in coronary sinus blood flow. Letter and response, 959
- Changes in exercise coronary sinus blood flow with training in patients with angina pectoris, 41
- Coronary sinus pacing. Letter and response, 187
- Echocardiographic evaluation of intracardiac pacing catheters: M-mode and two-dimensional studies, 1049
- CPK serum**
- Myocardial infarction size from serial CPK: variability of CPK serum ratio with size and model of infarction, 1143
- Cyanosis**
- Isolated drainage of the superior vena cava into the left atrium in a 52-year-old man. A rare congenital malformation in the adult presenting with cyanosis, polycythemia, and an unsuccessful lung scan, 751

D

Defibrillation

- A chronically implanted system for automatic defibrillation in active conscious dogs. Experimental model for treatment of sudden death from ventricular fibrillation, 90
- The "tail" of technology. Letter, 379

Diabetics

- Asymptomatic coronary artery disease: angiographic assessment of diabetics evaluated for renal transplantation, 1184

Diastolic function

- Beneficial effect of Salbutamol on cardiac function in severe congestive cardiomyopathy. Effect on systolic and diastolic function of the left ventricle, 449

Diastolic murmur

- The genesis of the diastolic murmur of complete heart block, 747

Diet

- A.H.A. committee report: diet and coronary heart disease, 762A
- A.H.A. committee report: value and safety of diet modification to control hyperlipidemia in childhood and adolescence — a statement for physicians, 381A
- Effects of dietary and pharmacologic alteration of serum lipids on platelet survival time, 365
- Effects of self-induced starvation on cardiac size and function in anorexia nervosa, 425
- Life styles, major risk factors proof and public policy, 3

Digital blood pressure

- Arterial insufficiency of the hand evaluated by digital blood pressure and arteriographic findings, 902

Digitalis

- The effect of digitalis on refractoriness of the intact canine His-Purkinje system, 284
- A multivariate approach for interpreting treadmill exercise tests in coronary artery disease, 505

Digoxin

- Contrasting rates of reversal of digoxin toxicity by digoxin-specific IgG and Fab fragments, 280
- Decreased bioavailability of digoxin due to hypercholesterolemic interventions, 164
- Relationship between plasma concentration and dose of digoxin in patients with and without renal impairment, 1196

Diltiazem

- Coronary arterial spasm and Prinzmetal's variant form of angina induced by hyperventilation and tris-buffer infusion, 56

Diphenylhydantoin

- Electrode-catheter arrhythmia induction in the selection and assessment of antiarrhythmic drug therapy in recurrent ventricular tachycardia, 971
- Recurrent sustained ventricular tachycardia. 3. Role of the electrophysiologic study in selection of antiarrhythmic regimens, 986

Disopyramide

- Electrode-catheter arrhythmia induction in the selection and assessment of antiarrhythmic drug therapy in recurrent ventricular tachycardia, 971
- Recurrent sustained ventricular tachycardia. 3. Role of the electrophysiologic study in selection of antiarrhythmic regimens, 986

Diuretics

- Primary hypertension refractory to triple drug treatment: a study on central and peripheral hemodynamics, 615

Dobutamine
